Smart Healthcare -Al Perspectives

Fulbright Lecture 2023 – KL Deemed University

Guntur, India, 1-31 July 2023

Prof./Dr. Saraju Mohanty University of North Texas, USA.

Outline

- Healthcare → Smart Healthcare
- Smart Healthcare Characteristics
- Smart Healthcare Components
- Smart Healthcare Examples
- Smart Healthcare Challenges
- Smart Healthcare Solutions of Challenges
- Conclusions and Future Directions

3

Healthcare to Smart Healthcare

4

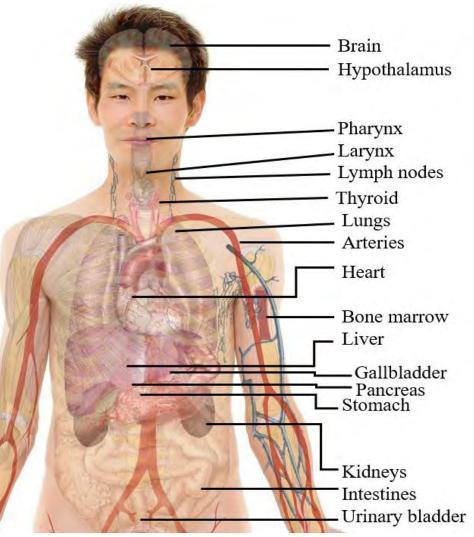

Human Body and Health

Human Body

From an engineering perspective, the human body can be defined as a combination of multi-disciplinary subsystems (electrical, mechanical, chemical...).

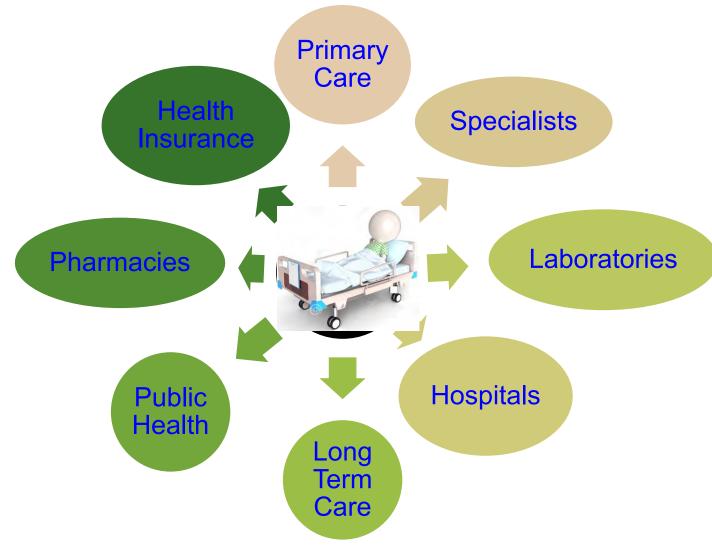

Health

Human health is a state of complete physical, mental and social well-being.

Traditional Healthcare

Physical presence needed

- Deals with many stakeholders
- Stakeholders may not interact
- May not be personalized
- Not much active feedback
- No follow-up from physicians

Electronic Health (eHealth)

Smart Healthcare -Characteristics

21

What is Smart Healthcare?

Smart Healthcare ← Conventional Healthcare + Body sensors + Smart Technologies +Information & Communication Technology (ICT) + AI/ML

Internet of Medical Things (IoMT) Internet of Health Things (IoHT)

Healthcare Cyber-Physical Systems (H-CPS)

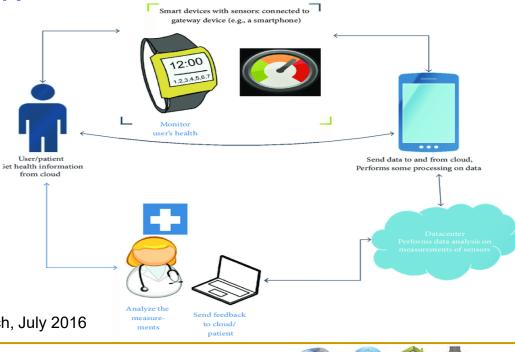

Source: P. Sundaravadivel, E. Kougianos, S. P. Mohanty, and M. Ganapathiraju, "Everything You Wanted to Know about Smart Health Care", *IEEE Consumer Electronics Magazine (MCE)*, Volume 7, Issue 1, January 2018, pp. 18-28.

Smart Healthcare - IoMT

- The Internet of Medical Things (IoMT) is the collection of medical devices and applications that connect to healthcare IT systems through online computer networks.
- Medical devices equipped with Wi-Fi allow the machine-to-machine communication that is the basis of IoMT.

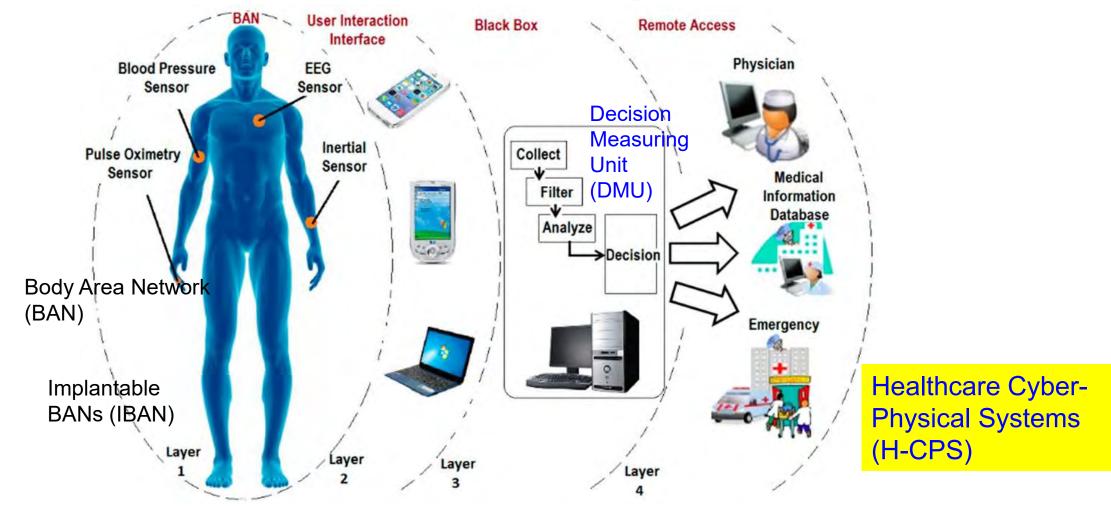

Smart Healthcare is defined by the technology that leads to better diagnostic tools, better treatment for patients, and devices that improves the quality of life for anyone and everyone.

29

Smart Healthcare - Advantages & Limitations

Advantages

Patients/Users

- Real-time interventions in emergency
- Cost reduction
- Reduced morbidity and financial burden due to less follow up visits

Healthcare Service Providers

- Optimal utilization of resources
- Reduced response time in emergency

Manufacturers

- Standardization/compatibility and uniformity of data available
- Capability to sense and communicate health related information to remote location

Limitations

Technical Challenges

- Security of IoT data hacking and unauthorized use of IoT
- Lack of standards and communication protocols
- Errors in patient data handling
- Data integration
- Need for medical expertise
- Managing device diversity and interoperability
- Scale, data volume and performance

Market Challenges

- Physician compliance
- Data overload on healthcare facility
- Mobile hesitation
- Security policy compliance

Source: Y. Shelke and A. Sharma, "Internet of Medical Things", 2016, Aranca, https://www.aranca.com/knowledge-library/special-reports/ip-research/the-internet-of-medical-things-iomt, Last Visited 10/18/2017.

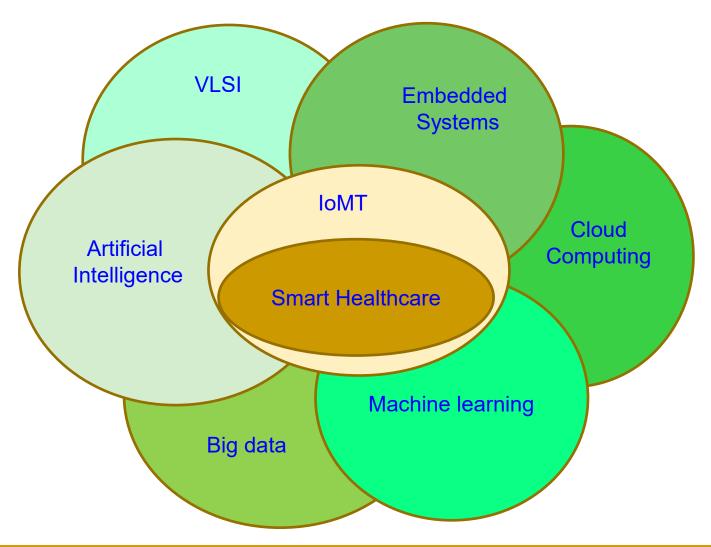

Smart Healthcare -Components

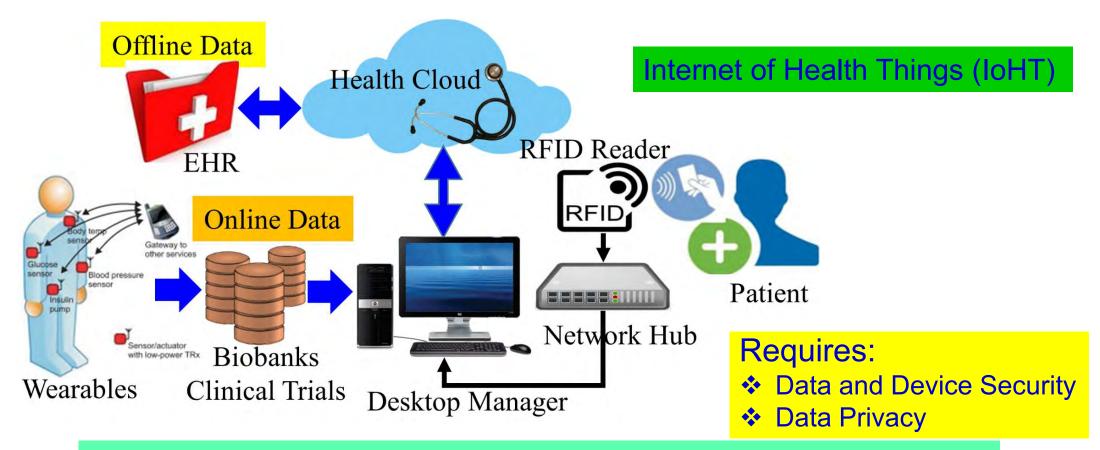

32

Smart Healthcare - Verticals

Internet of Medical Things (IoMT)

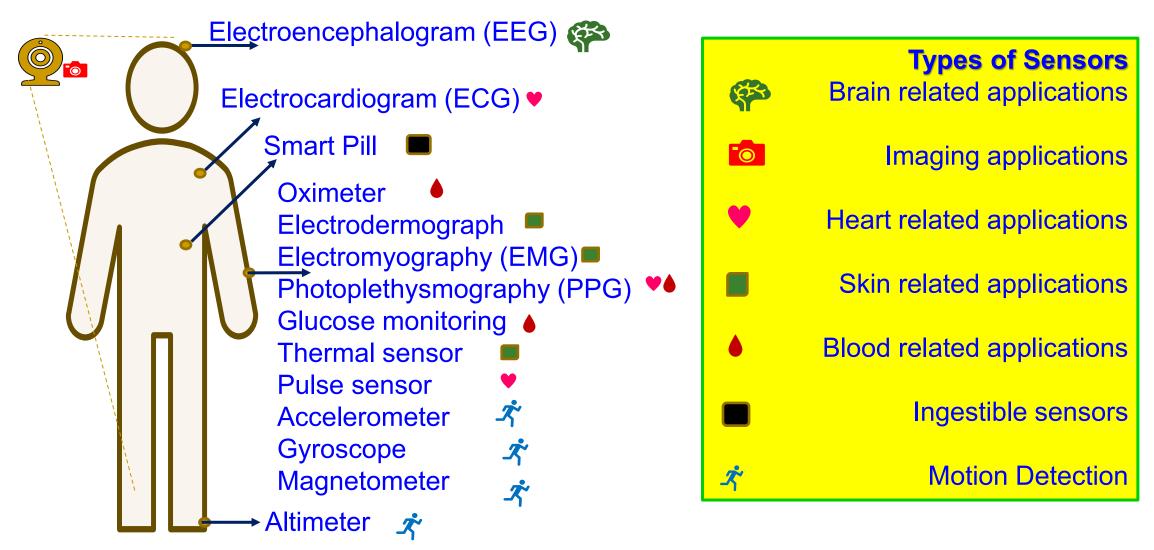

IoMT is a collection of medical sensors, devices, healthcare database, and applications that connected through Internet.

Source: http://www.icemiller.com/ice-on-fire-insights/publications/the-internet-of-health-things-privacy-and-security/ Source: http://internetofthingsagenda.techtarget.com/definition/IoMT-Internet-of-Medical-Things

Smart Healthcare Sensors

Photoplethysmograph (PPG)

Green LED - 540 nm wavelength – Preferred for wearables

Source: https://www.wareable.com/fitbit/fitbitred-light-optical-sensor-technology-2034

The body absorbs green really well, it's great for reducing signal distortion, but it doesn't penetrate deep. A lot of it is absorbed by your body so you don't get anything deeper than heart rate.

Red LED - 645 nm wavelength - Preferred for hospitals and health industry

Source: https://willem.com/blog/2017-11-15_collecting-health-data-with-biostrap/

The body is a poor absorber of red light allowing the light to pass much deeper into the body and a larger volume of tissues to help provide more insightful data and could lead to improved accuracy with biometric data like heart rate.

37

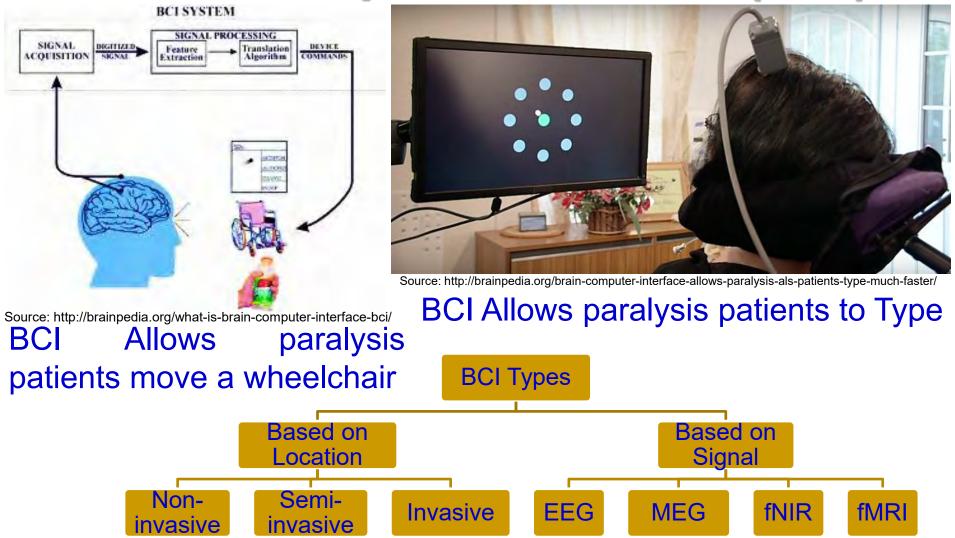

Smart Healthcare Communication

Frequency Band	Data Rate	Range	Transmission Power

Brain Computer Interface (BCI)

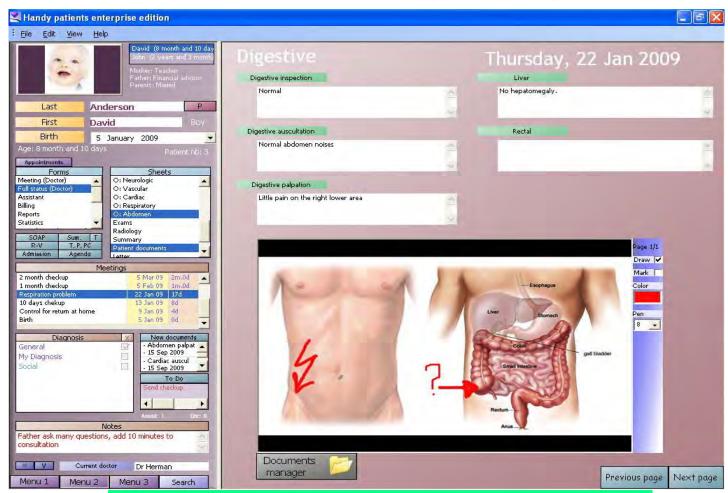

Electronics Health Record (EHR)

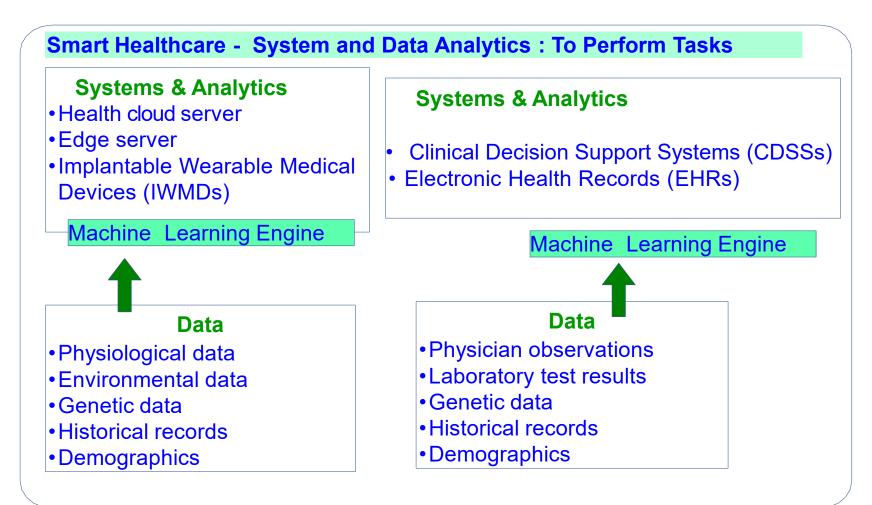

- Electronic Health Record (EHR) is the systematized collection of health information of individuals stored in a digital format.
- Created by various health providers such as hospitals and clinics.

Electronic Medical Record (EMR)

Smart Healthcare – AI/ML Framework

Smart Healthcare – AI/ML is Key

Source: Robert Pearl, "Artificial Intelligence In Healthcare: Separating Reality From Hype", 13 Mar 2018, https://www.forbes.com/sites/robertpearl/2018/03/13/artificial-intelligence-in-healthcare/?sh=598aa64d1d75 AI Role Includes:

- Automatic diagnosis
- Disease predication
- Diet prediction
- Pandemic projection
- Automatic prescription

50

Smart Healthcare – ML ...

No labelled dataset is provided and output is

Learning based on pattern identification and

Reinforcement learning

• Based on trial and error with reward or

Algorithm trains to improve outcome over

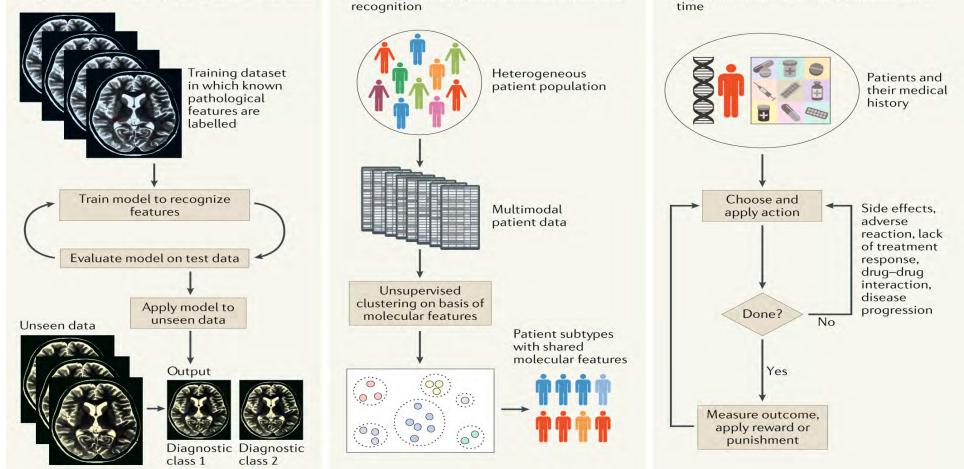

punishment before repetition

Unsupervised learning

unknown

Supervised learning

- A labelled dataset is provided
- Learning is task-driven
- Algorithm trains to improve outcome over time

Source: Myszczynska, M.A., Ojamies, P.N., Lacoste, A.M.B. et al. Applications of machine learning to diagnosis and treatment of neurodegenerative diseases. Nat Rev Neurol 16, 440–456 (2020). https://doi.org/10.1038/s41582-020-0377-8

Smart Healthcare – Specific Examples

52

Stress is a Global Issue

- In major global economies 6 in 10 workers experiencing increased workplace stress.
- In USA: 75% of adults reported experiencing moderate to high levels of stress. 1 out of 75 people may experience panic disorder.
- In Australia: 91% of adults feel stress in at least one important area of their lives.
- In UK: An estimated 442,000 individuals, who worked in 2007/08 believed that they were experiencing work-related stress
- Depression is among the leading causes of disability worldwide.
 25% of those with depression world-wide have access to effective treatments → 75% don't have.

Source: http://www.gostress.com/stress-facts/

Stress Monitoring and Control is Needed

Stress is the body's reaction to any change that requires an adjustment or response.

Sudden encounter with stress →Brain floods body with chemicals and hormones (adrenaline and cortisol)

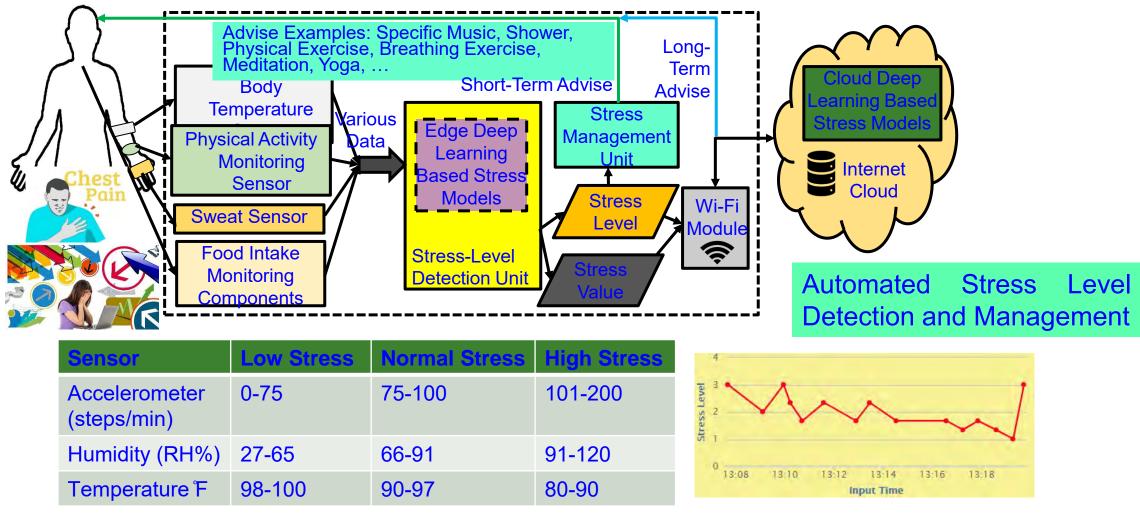

- Lack of Energy
- Type 2 Diabetes
- > Osteoporosis
- Mental cloudiness (brain fog) and memory problems
- A weakened immune system, leading to more vulnerable to infections

Stress Monitoring & Control – Our Vision

Source: L. Rachakonda, S. P. Mohanty, E. Kougianos, and P. Sundaravadivel, "Stress-Lysis: A DNN-Integrated Edge Device for Stress Level Detection in the IoMT", *IEEE Transactions on Consumer Electronics (TCE)*, Vol 65, No 4, Nov 2019, pp. 474--483.

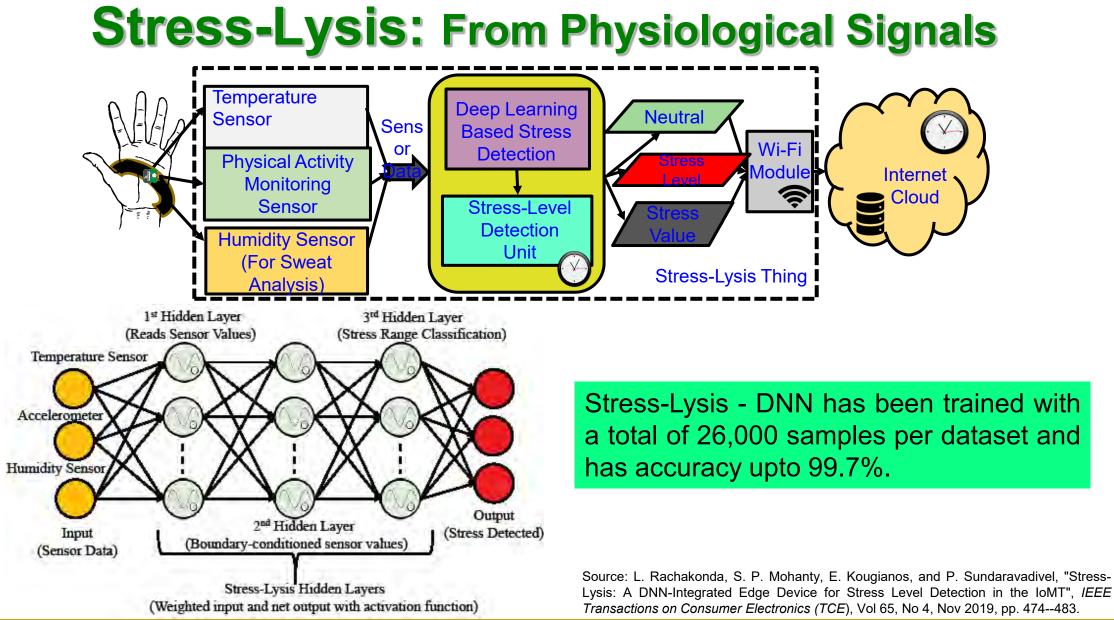

Consumer Electronics Devices – Can Provide Data for Stress Detection

Brand	Device	Signals	RTI	Ambulant
Empatica	E4 wristband	PPG, GSR, HR, ACC, ST	Yes	Yes
Garmin	Vivosmart	HR, HRV, ACC	Yes	Yes
Zephyr	BioHarness 3.0	HR, HRV, GSR, ACC, ST	Yes	Yes
iMotions	Shimmer 3+ GSR	GSR, PPG	Yes	No
BIOPAC	Mobita Wearable	ECG, EEG, EGG EMG, and EOG	Yes	No

GSR = Galvanic Skin Response, HR = Heart Rate, ACC = Acceleration, ST = Skin Temperature, HRV = Heart Rate Variability, PPG = Photoplethysmograph, RTI = Real Time Implementation

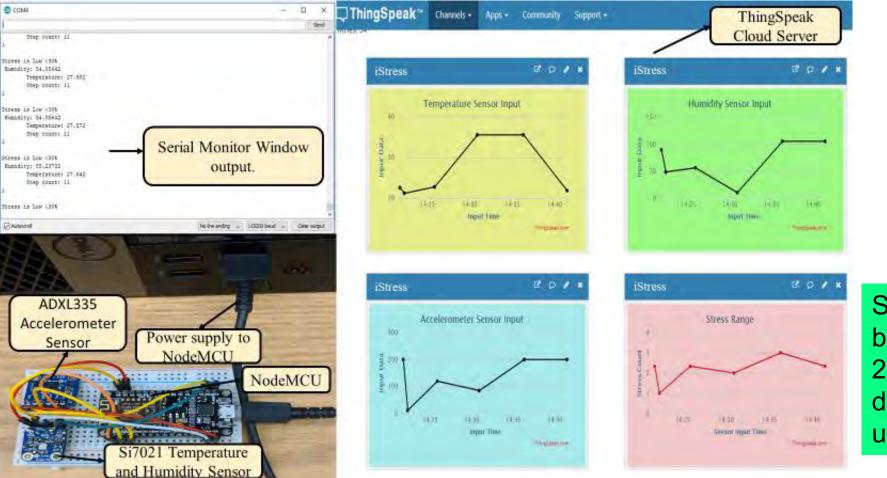

Source: R. K. Nath, H. Thapliyal, A. Caban-Holt, and S. P. Mohanty, "Machine Learning Based Solutions for Real-Time Stress Monitoring", *IEEE Consumer Electronics Magazine (MCE)*, Vol. 9, No. 5, September 2020, pp. 34--41.

Stress-Lysis: Experiments

Stress-Lysis - DNN has been trained with a total of 26,000 samples per dataset and has accuracy upto 99.7%.

Source: L. Rachakonda, S. P. Mohanty, E. Kougianos, and P. Sundaravadivel, "Stress-Lysis: A DNN-Integrated Edge Device for Stress Level Detection in the IoMT", *IEEE Transactions on Consumer Electronics (TCE)*, Vol 65, No 4, Nov 2019, pp. 474--483.

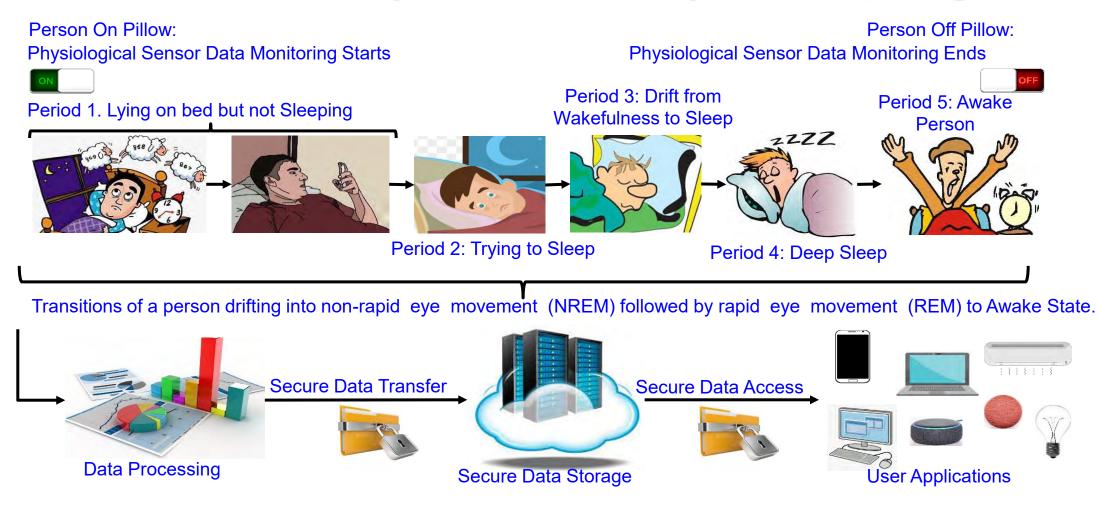

Consumer Electronics Sleep Trackers

Consumer Products	Approach	Features	Drawbacks	
itbit [34] Wearable		Heart rate monitor, sleep stages monitor. Has techniques to improve the sleep score.	Relationship between stress and sleep is not discussed.	
SleepScore Max [36]	Non-wearable	Invisible radio wave sleep tracking	Does not manage stress with sleep.	
Nokia Sleep [38]	Non-wearable	Uses Ballistocardiography sensor	Does not explain the relationship with stress with sleep.	
Xiaomi Mi Band 3 [31]	Wearable	Pulse Monitor	No information on importance of quality sleep.	
Eversleep [32]	wearable	Snoring and breathing interruptions	No explanation on the relationship between stress and sleep.	
Beddit [35]	Non-wearable	Monitors snoring	Doesn't consider other possible features.	
Eight [37]	Non-Wearable	Humidity, temperature, heartbeat, breathing rate	No data on how it is important to have a good sleep.	
Dreem [33]	Wearable	Simulates slow brain waves	It doesn't consider other features Does not manage stress with sleep	
Muse [26]	Wearable	Simulates brain waves	No understanding of the impor- tance of quality sleep.	

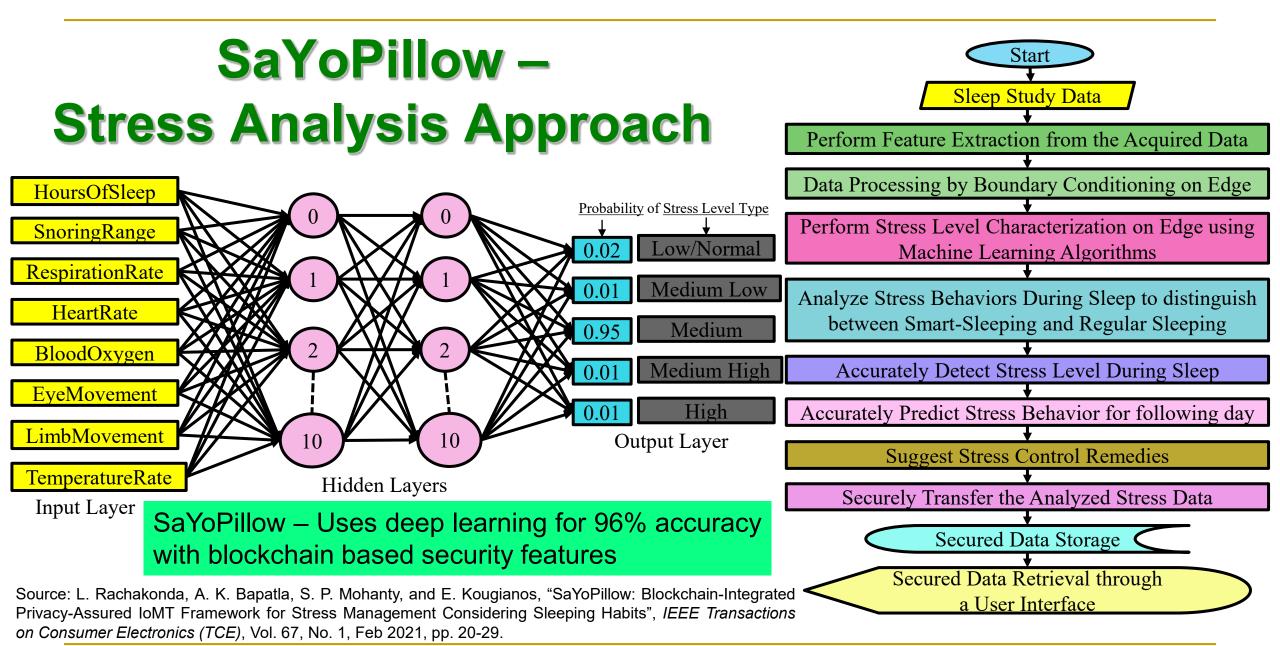

Smart-Yoga Pillow (SaYoPillow) - Sleeping Pattern

Smart Healthcare AI -- Prof./Dr. Saraju Mohanty

Imbalance Diet is a Global Issue

- Imbalanced diet can be either more or fewer of certain nutrients than the body needs.
- In 2017, 11 million deaths and 255 million disability-adjusted life-years (DALYs) were attributable to dietary risk factors.
- Eating wrong type of food is potential cause of a dietary imbalance:

Source: https://obesity-diet.nutritionalconference.com/events-list/imbalanced-diet-effects-and-causes https://www.thelancet.com/article/S0140-6736(19)30041-8/fulltext

Elderly Fall Automatic Detection is Needed to Improve Quality of Life

- Elderly Fall: Approximately a third of elderly people 65 years or older fall each year.
- ➤ Fall Caused → Over 800,000 hospital admissions, 2.8 million injuries and 27,000 deaths have occurred in the last few years.

Source: L. Rachakonda, A. Sharma, S. P. Mohanty, and E. Kougianos, "Good-Eye: A Combined Computer-Vision and Physiological-Sensor based Device for Full-Proof Prediction and Detection of Fall of Adults", in *Proceedings of the 2nd IFIP International Internet of Things (IoT) Conference (IFIP-IoT)*, 2019, pp. 273--288.

Consumer Electronics for Fall Detection

Wearables

Apple watch: uses only accelerometers, doesn't work on low thresholds like double carpet, bathroom, hardwood floors. The user must manually select the option SOS and as a reason it fails if the person is unconscious. Users may remain on the floor with no help for large hours.

Drawbacks

Philips Lifeline: Uses only accelerometers and barometric sensors for pressure changes. After the fall, the system waits for 30 sec and directly connects to help.

Lively Mobile by greatcall and Sense4Care Angel4: Monitors fluctuations using only accelerometers.

Bay Alarm Medical and Medical Guardian: Use only accelerometers. Have huge base stations limiting the usage and location access.

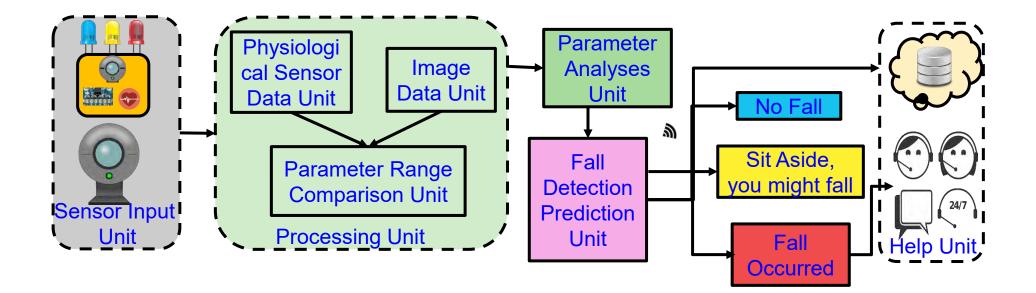

Issues of Existing Research

- Decisions of fall are dependent on the changes in accelerometer axes only.
- Some applications have user to give response after the fall and that can be time consuming as the user might not be conscious.
- Some applications are limited to a certain location and certain type of surroundings which add up the additional costs.
- Prediction of fall or warning the user that there might be an occurrence of fall is not provided by most of the applications.

Epileptic Seizure Has Global Impact

- Up to 1% of the world's population suffers from epilepsy.
- Epilepsy is the fourth most common neurological disease after migraine, stroke, and Alzheimer's.
- Individuals can suffer a seizure at any time with potentially disastrous outcomes including a fatal complication called "Sudden Unexpected Death in Epilepsy" (SUDEP).

Embrace2: Smart-band which uses machine learning to detect convulsive Seizures and notifies caregivers.

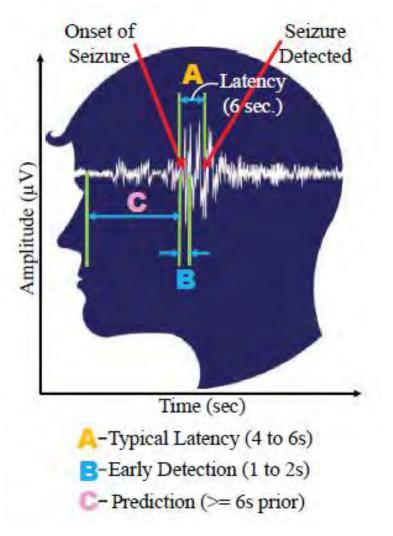

Source: https://www.empatica.com/embrace2/

 Medical grade smart watch: It detects generalized clonic-tonic Seizures and notifies physicians.

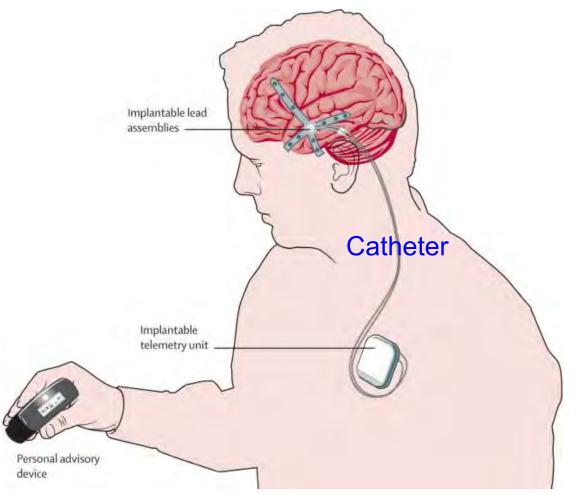

Drawbacks of Existing Works?

- High seizure detection latency.
- Not suitable for real time IoMT deployment.
- Intervention mechanism after detection is lacking.

Krig-Detect: Exploring Kriging Methods for Real-Time Seizure Detection from EEG Signals

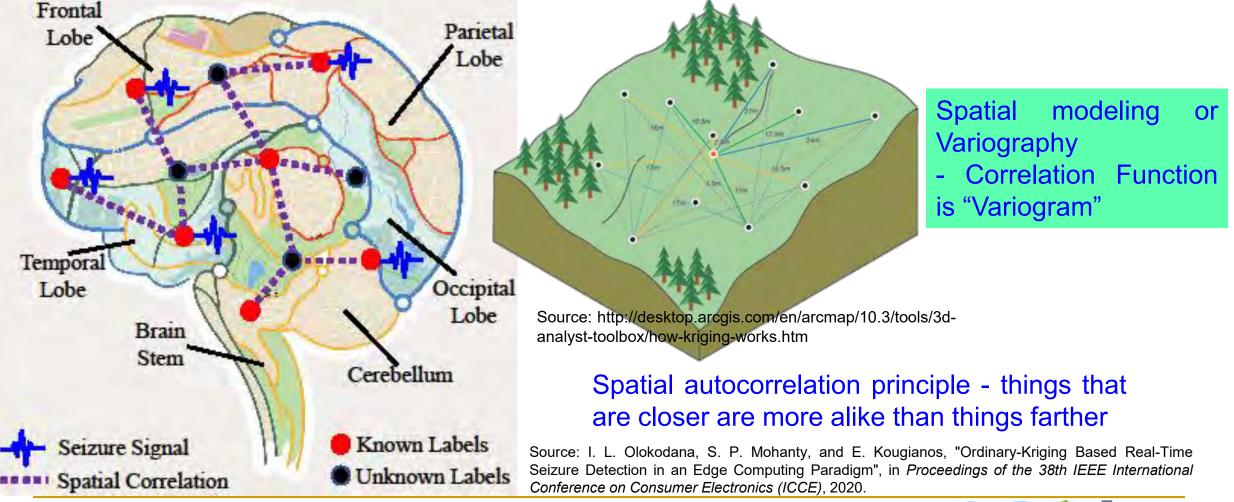

- To the best of the authors' knowledge, this is the first work where multiple Kriging methods have been used for real-time seizure detection in an edge computing paradigm.
- A novel achievement of an epileptic seizure detection latency of less than 1 second while maintaining a comparable accuracy with existing models and O(1) time and space complexity for edge computation.

137

- DNN considers many training parameters, such as the size, the learning rate, and initial weights.
- High computational resource and time: For sweeping through the parameter space for optimal parameters.
- DNN needs: Multicore processors and batch processing.
- > DNN training happens mostly in cloud not at edge or fog. Source: Mohanty iSES 2018 Keynote

DNNs are not Always Smart

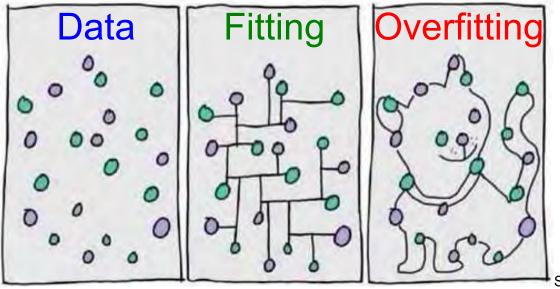

Machine learning: "I'm as intelligent as human beings". Also machine learning:

DNN - Overfitting or Inflation Issue

- DNN is overfitted or inflated If the accuracy of DNN model is better than the training dataset
- DNN architecture may be more complex than it is required for a specific problem.
- Solutions: Different datasets, reduce complexity

Source: www.algotrading101.com

144

DNN - Class Imbalance Issue

- Class imbalance is a classification problems where the classes are not represented equally.
- Solutions: Use Precision, Recall, F-measure metrics
 Not only RMSE like accuracy metrics

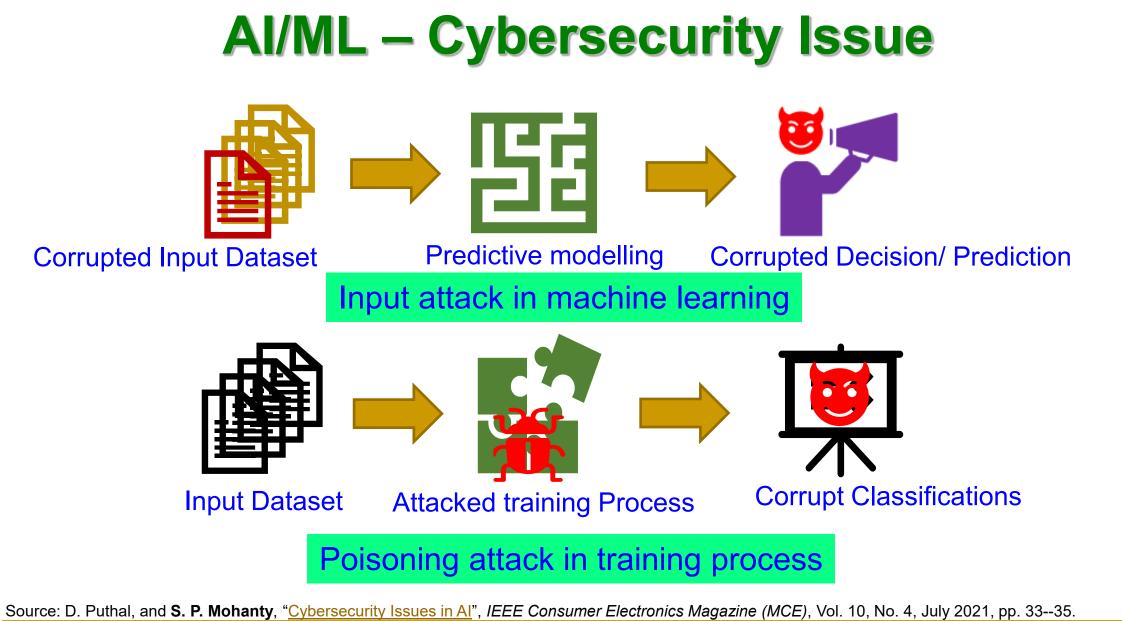

AI/ML - Vulnerability

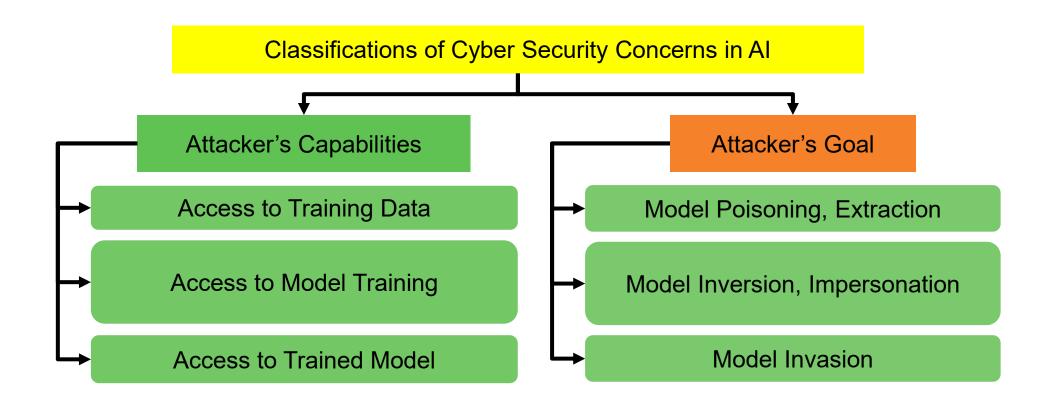

- Key vulnerabilities of machine learning systems
 - ML models often derived from fixed datasets
 - Assumption of similar distribution between training and real-world data
 - Coverage issues for complex use cases
 - Need large datasets, extensive data annotation, testing
- Strong adversaries against ML systems
 - ML algorithms established and public
 - Attacker can leverage ML knowledge for Adversarial Machine Learning (AML)
 - Reverse engineering model parameters, test data Financial incentives
 - Tampering with the trained model compromise security

- Quality data exists at different location on various edge devices.
- Data privacy laws control the movement of data.
- FL is the way to provide ML solution without breaking privacy laws.

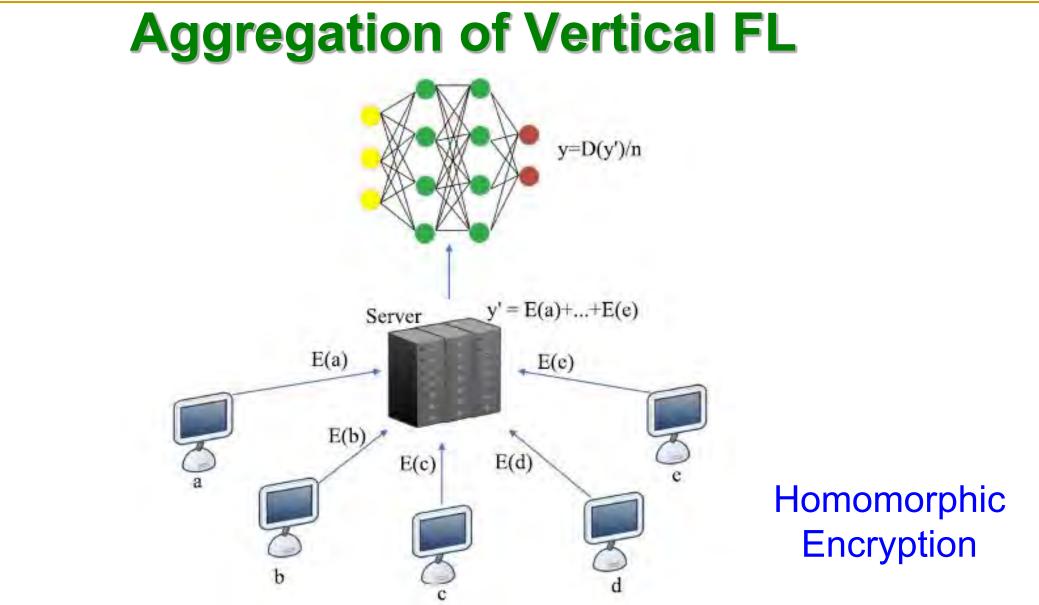

Horizontal FL System

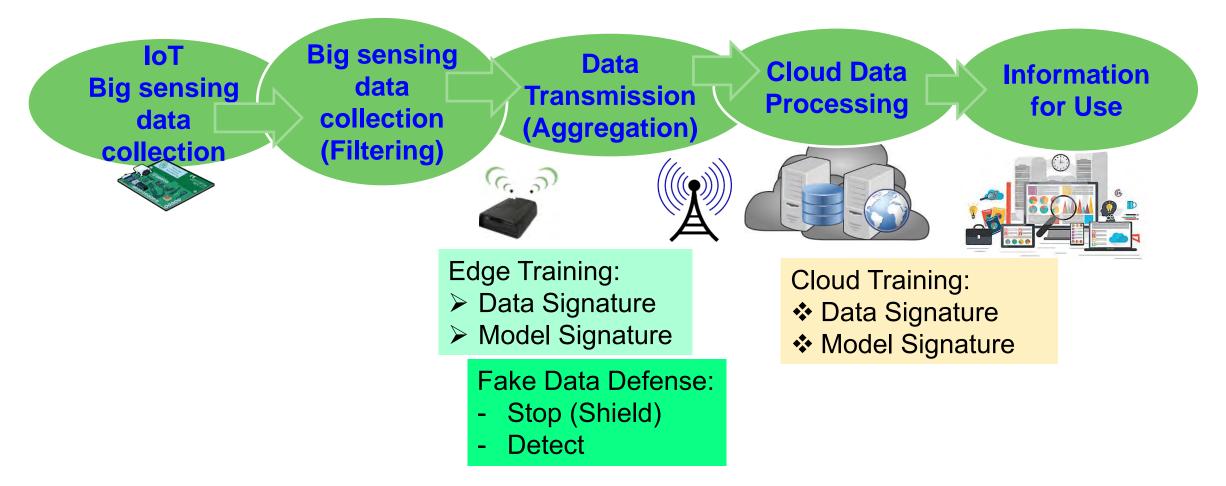

- 1) Train global model in the server.
- 2) Deploy global model to edge devices.
- 3) Optimize model from each edge device.
- 4) Upload locally trained model update.
- 5) Average the update values and apply the average to the global model.
- 6) Repeat step 2 to step 5.

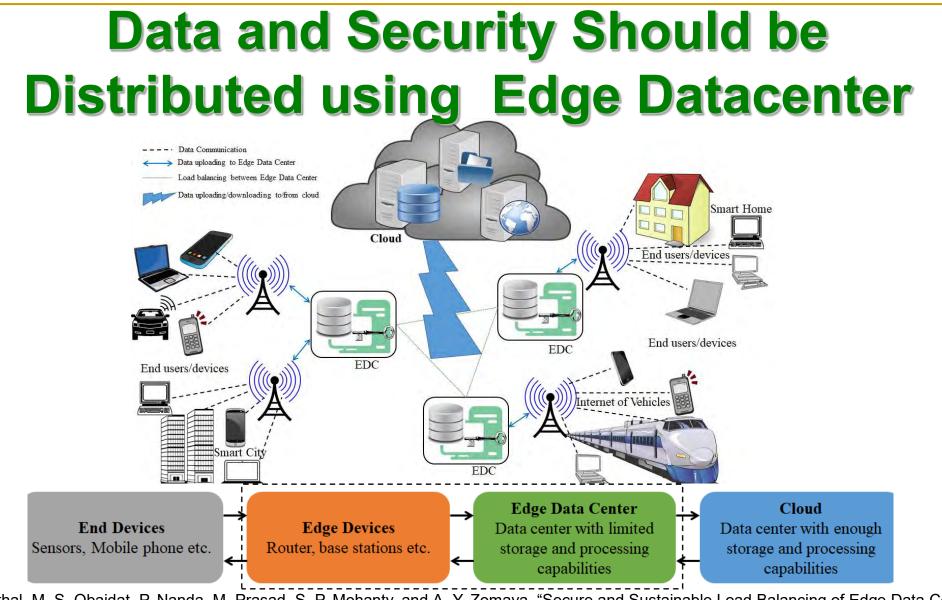

Secure Data Curation a Solution for Fake Data?

Source: C. Yang, D. Puthal, S. P. Mohanty, and E. Kougianos, "Big-Sensing-Data Curation for the Cloud is Coming", *IEEE Consumer Electronics Magazine (CEM)*, Volume 6, Issue 4, October 2017, pp. 48--56.

Our Proposed Secure Edge Datacenter

Algorithm 1: Load Balancing Technique

1. If (EDC-I is overloaded)

- 2. EDC-I broadcast (E_i, L_i)
- 3. EDC-J (neighbor EDC) verifies:
- 4. If (E_i is in database) & (p≤0.6&L_i<<(n-m))
 - Response E_{Kpui}(E_j||K_j||p)
- 6. EDC-I perform $D_{Kpr_i}(E_j||K_j||p)$

7.
$$k'_j \leftarrow E_j$$

5.

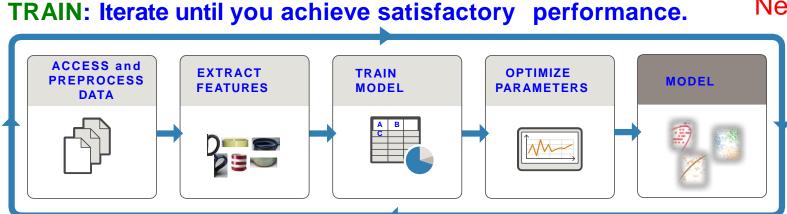

8. If
$$(k'_j = k_j)$$

Response time of the destination EDC has reduced by 20-30% using the proposed allocation approach.

Conclusions and Future Research

183

Smart Healthcare AI -- Prof./Dr. Saraju Mohanty

Conclusions

- Healthcare has been evolving to Healthcare-Cyber-Physical-System (H-CPS) i.e. smart healthcare.
- Internet of Medical Things (IoMT) plays a key role smart healthcare.
- Smart healthcare can reduce cost of healthcare and give more personalized experience to the individual.
- IoMT provides advantages but also has limitations in terms of security, and privacy.

184

Future Research

- Machine learning (ML) models for smart healthcare needs research.
- Internet-of-Everything (IoE) with Human as active part as crowdsourcing need research.
- Tiny-ML or Edge-AI for smart healthcare needs research.
- Security of IWMDs needs to have extremely minimal energy overhead to be useful and hence needs research.

185
